

Sebastián Ruiz Jaramillo

Full Stack Developer | Laravel, Vue.js, PHP, MySQL

Colombia, Medellín • sebastianruizj2014@gmail.com • 302 5301357 • rsebs.github.io/my-portfolio • sebastianruizjaramillo

Rsebs

Summary

Full Stack Developer with 3+ years of experience building web applications using Laravel, Vue.js, PHP, and MySQL. Proven track record integrating REST APIs, optimizing database performance, automating processes with Docker and Bash, and working in agile teams (Scrum/Kanban) with Git/GitFlow version control. Additional experience with Power BI Embedded and Microsoft Azure for dynamic report generation and cloud infrastructure automation (Azure Automation). Focused on writing maintainable code with unit testing, and solving complex technical problems that drive measurable business impact.

Education

Technical Degree - **Politécnico Mayor**, Technical Degree in Software Development and Databases – Medellín, Colombia June 2022 – Nov 2023

De-
gree

Technical training in software development with Java, Python, PHP, HTML, CSS, and JavaScript, along with the design and administration of relational databases (MySQL, PostgreSQL).

- Web development with Java, Python, and PHP.
- Design and administration of MySQL and PostgreSQL databases.
- Complementary technologies: HTML, CSS, and JavaScript.
- Recognized as an outstanding student for strong adaptability and fast learning ability.

Experience

Psicol SAS, Full Stack Web Developer – Medellín, Colombia Dec 2023 – Apr 2026

Full Stack Developer specialized in PHP and Laravel, with experience in legacy systems, REST API integration, Microsoft Azure, Power BI Embedded, Docker, unit testing, and agile methodologies (Scrum/Kanban). Focused on building scalable solutions, optimizing performance, and solving complex technical problems.

- Power BI Embedded on Azure: implemented PDF report export via the Power BI API, including authentication setup and filter mapping for dynamic reports.
- Infrastructure automation: automated the start-up and shutdown of Azure resources using Azure Automation Runbooks, reducing operational costs.
- Software scalability: designed and implemented a centralized helper repository in PHP/Laravel, optimizing integration across multiple APIs and system modules.
- Process automation: developed Bash/Shell scripts for repetitive tasks, reducing execution time from hours to minutes.
- Database optimization: reduced response times by 30% through more efficient SQL queries and improvements to the MySQL database architecture.
- Docker infrastructure optimization: redesigned Docker container usage, reducing resource consumption from 80% to 20% by centralizing shared services.
- Code quality: wrote unit tests to ensure the stability of new features and prevent regressions.
- Agile teamwork: collaborated in a Scrum/Kanban environment with Git/GitFlow version control, providing technical support and input on architecture decisions.

Hospital Neurológico de Colombia, Full Stack Developer (Internship) – Medellín, Colombia Mar 2023 – Sept 2023

Web application developer using Java Spring Boot and MySQL, involved in REST API design, business logic, and database management, with a focus on performance and reliability.

- Led a complete refactor of the company's internal website as the main project of the internship.
- Improved performance and response times for MySQL database queries.
- Built web applications with Java Spring Boot and designed REST APIs.

Projects

Sociisoft – Medellín, Colombia

May 2026 – present

Co-founder and Full Stack Developer at Sociisoft, a custom software development startup founded together with four Colombian entrepreneurs, focused on services for the public and private sectors. Responsible for end-to-end development of solutions, covering frontend, backend, databases, and infrastructure.

- Full stack development of custom software solutions for public and private sector clients.
- Active participation in early-stage technical and product decisions, taking on multiple roles (development, architecture, and support).

Skills

Frontend: Vue.js, React, TypeScript, JavaScript (ES6+), HTML5, CSS3

Backend: PHP, Laravel, Eloquent ORM, Java, Spring Boot, JPA/Hibernate, Python, FastAPI, RESTful APIs

Cloud / DevOps: Microsoft Azure, Azure Automation, Docker, Git, GitFlow, CI/CD

Databases: MySQL, PostgreSQL, SQL query optimization

Development Practices: Agile methodologies (Scrum, Kanban), unit testing, version control, automation with Bash/Shell

Languages: Spanish (Native), English (Intermediate B1)
